COMPLAINT

For its Complaint, Plaintiff LWD PRP Group (“LWD PRP Group”), by and through counsel, states and alleges as follows:

STATEMENT OF THE CASE

1. This is a civil action pursuant to the provisions of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, 42 U.S.C.

§ 9601 *et seq.* (“CERCLA”), for recovery of past and future response costs incurred and to be incurred by the LWD PRP Group for response activities undertaken and to be undertaken at the LWD Incinerator Site, which consists of that portion of LWD, Inc. Superfund Site at 2745 Industrial Boulevard in Calvert City, Marshall County, Kentucky, where operations at the former LWD waste incinerator occurred, as well as any area where hazardous substances that migrated from the LWD waste incinerator have come to be located (hereinafter “LWD Incinerator Site”).

2. The LWD PRP Group seeks cost recovery and contribution from each Defendant pursuant to Sections 107(a) and 113(f) of CERCLA, 42 U.S.C. §§ 9607(a) and 9613(f), and pursuant to Kentucky Revised Statutes § 224.01-400, for past and future response costs which the LWD PRP Group has paid and may pay in the future at the LWD Incinerator Site, along with a declaration as to each Defendant’s liability and an allocation of past and future response costs among all parties.

JURISDICTION AND VENUE

3. This Court has jurisdiction over the subject matter of this action pursuant to Sections 107(a) and 113(b) of CERCLA, 42 U.S.C. §§ 9607(a) and 9613(b), providing jurisdiction over controversies arising under CERCLA; and pursuant to 28 U.S.C. § 1331, providing for jurisdiction over controversies involving federal questions of law.

4. Venue is proper in this district pursuant to Sections 107(a) and 113(b) of CERCLA, 42 U.S.C. §§ 9607(a) and 9613(b), and 28 U.S.C. §§ 1391(b) and (c), because the release or threatened release of hazardous substances occurred at or from the LWD Incinerator Site located in this judicial district.

FACTUAL BACKGROUND

5. The LWD Incinerator Site is the area of the LWD, Inc. Superfund Site where a former hazardous waste incinerator operated from the 1970s until 2004.

6. The LWD Incinerator Site operated under the Resource Conservation and Recovery Act (“RCRA”) from approximately 1980 through mid-2004

7. RCRA requires individuals who generate or transport hazardous waste, or who operate a facility for recycling, treating, storing, or disposing (TSD) of hazardous waste, to notify EPA or their authorized State waste management agency of their regulated waste activities and obtain a U.S. EPA Identification (ID) Number (also known as a RCRA ID Number) (hereinafter “EPA ID No.”)

8. Each of the Defendants, and/or their predecessors and/or affiliated entities, generated and/or transported waste containing hazardous substances, which waste was disposed of at the LWD Incinerator Site, using RCRA hazardous waste manifests with EPA ID No(s). issued to each such Defendant, and/or predecessor(s) and/or affiliated entity(ies) (hereinafter “manifested waste”)

9. The entities who operated the LWD Incinerator Site over time compiled the RCRA hazardous waste manifests of shipments of manifested waste sent to the LWD Incinerator Site into annual reports the LWD Incinerator Site operators were required to submit to EPA (hereinafter “Annual Reports”).

10. The entities who operated the LWD Incinerator Site over time submitted multiple hazardous waste permit applications, some of which were denied by the Kentucky Department of Environmental Protection (“KDEP”).

11. These operating entities received numerous Notices of Violation from KDEP on various issues (e.g., leaking drums, leaking roll-off containers, containers with holes, waste accumulating in containment areas, wastes that were fuming and had strong solvent odors, and pumps leaking scrubber water).

12. The LWD Incinerator Site owners and operators failed to comply with multiple Orders intended to address the ongoing environmental issues at the LWD Incinerator Site.

13. In February 2006, KDEP requested assistance from U.S. EPA's ("EPA's") Emergency Response and Removal Branch ("ERRB") Superfund Division in an effort to categorize environmental hazards at the LWD Incinerator Site.

14. The ERRB performed a removal site evaluation in February 2006 and determined that a time-critical removal action was necessary to stabilize the LWD Incinerator Site due to the threats of release of unknown substances posed by a large tank farm and containment area with the potential to cause an off-site release.

15. EPA signed an initial Action Memorandum regarding the LWD Incinerator Site in March 2006, and two additional Action Memoranda in April and August 2006

16. Based on the fact the LWD Incinerator Site was abandoned, EPA commenced a time-critical response action at the LWD Incinerator Site the week of March 6, 2006.

17. Results from sampling performed by EPA at this time showed elevated concentrations of various hazardous substances were present on the LWD Incinerator Site.

18. A Final CERCLA Emergency Response Action and Removal Site Evaluation Report prepared for EPA and dated July 28, 2006 recommended that a removal action be conducted at the LWD Incinerator Site in accordance with 40 CFR Part 300, Section 415(b)(1).

19. This recommendation was based on the following criteria: (1) actual or potential exposure to nearby human populations, animals, or the food chain from hazardous substances or pollutants; (2) hazardous substances or pollutants in drums, barrels, tanks, or other bulk storage containers, that may pose a threat of release of hazardous substances at or from the LWD Incinerator Site; (3) weather conditions that may cause hazardous substances or pollutants to migrate or be released at or from the LWD Incinerator Site; and (4) threat of fire or explosion.

20. EPA conducted a time-critical removal action between March 2006 and February 2007 to reduce some of the urgent threats posed by several areas of the LWD Incinerator Site.

21. On March 1, 2007, 58 potentially responsible parties, including members of the LWD PRP Group, entered into an Administrative Settlement Agreement and Order on Consent for Removal Action (hereinafter "Removal Action AOC") with EPA to perform specified remaining time-critical removal action activities at the LWD Incinerator Site and to pay EPA's future response costs associated with the LWD Incinerator Site

22. The LWD PRP Group and other PRPs who entered into the Removal Action AOC completed the Removal Action AOC activities in September 2009, when EPA issued a September 29, 2009 Notice of Completion of same.

23. The LWD PRP Group is currently negotiating with EPA regarding a settlement pursuant to Section 122(h) of CERCLA, 42 U.S.C. § 9622(h), for EPA's past response costs at the LWD Incinerator Site, which costs exceed \$4.8 million.

24. The LWD PRG Group is also currently negotiating with KDEP regarding certain remediation, monitoring and maintenance activities that KDEP is requiring to be conducted at the LWD Incinerator Site, and regarding KDEP's past and future response costs.

25. To date, the LWD PRP Group has incurred over \$9.5 million in LWD Incinerator Site response costs.

26. The \$9.5 million in past response costs incurred by the LWD PRP Group do not include all attorneys' fees and expenses that are closely tied to response actions at the LWD Incinerator Site, which the LWD PRP Group is also entitled to recover against parties liable under CERCLA.

27. The LWD PRP Group will continue to incur LWD Incinerator Site response costs to perform the actions required by the EPA and the State of Kentucky.
